DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 14-23, drawn to a method of forming an abrasive material from mixing and drying an aqueous polymer dispersion and an abrasive grit, classified in class 524, subclass 558.
 - II. Claims 24 and 36, drawn to an abrasive paper, classified in class 451, subclass 539.
 - III. Claims 25 and 37, drawn to an abrasive cloth, classified in class 451, subclass 539.
 - IV. Claims 26 and 38, drawn to a scouring pad , classified in class 51, subclass 295.
 - V. Claims 27-35, drawn to an abrasive material, classified in class 510, subclass 395.

The inventions are distinct, each from the other because of the following reasons:

2. Invention I is related to each of invention II-V as a process of making and products made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, regarding II-IV, the process as claimed can be used to make other and materially different products and

evidenced by groups II-IV. Regarding group V, the product as claimed can be made by another and materially different process not requiring the pH adjustment of group I.

Inventions II- V are unrelated are unrelated as they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

3. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the others, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Roland E. Martin on 7/11/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
